

Deskely at a glance.

Autonomous engineers for capital projects.

Deskely builds autonomous engineers for capital projects. On one platform, AI engineers read every drawing, build the tag register and check every record, from the first P&ID to handover. The platform has been in production since 2014 and is the fleet standard for completions on MODEC FPSOs. Deskely is the trading name of Compass Energy Pte. Ltd., headquartered in Singapore since 2003.

2003 Founded in Singapore	2014 Platform in production	10 Offshore programmes	Thousands Daily users
